

opportunities

TTP is looking for bright, hardworking, innovative and hands-on scientists and engineers with a high degree of commercial awareness to contribute to the continued growth and success of our business. Our success depends on the technical excellence, flexibility and commitment of our staff to ensure we meet our customers' targets – development timescales are short, the specifications demanding, and the projects often require international travel.

Technology Consultant specialising in Low Carbon Innovation (ref.www-AS10)

Applied Science Group

The Applied Science group at TTP is a multidisciplinary team of scientists and engineers developing leading edge technologies and products for clients across a range of markets from healthcare to consumer products and energy efficient systems. We are seeking a highly skilled consultant with a strong engineering or physics background to join our team. The successful candidate will have strong academic credentials, an intuitive grasp of fundamental scientific principles, and demonstrable drive and commitment.

The role will include assessing and developing low carbon technologies as well as leading diverse projects supporting small UK companies seeking to commercialise technologies that can reduce global CO2 emissions. These projects will involve both technical and business consulting activities. The role will also involve contributing to the broader work of the group in technology and product development.

Qualifications:

- Strong academic record in physics or engineering with a 1st or 2.1 from a leading institution. A PhD would be an asset.
- Track record of developing advanced technology in an industrial setting and delivering technology based projects with challenging timelines and product requirements.
- Strong market awareness and capability to see opportunities for technologies. Knowledge of the “cleantech” or low carbon technology sectors would be an advantage.
- First rate communication skills, strong analytical skills, coherent and persuasive presentation and writing skills.
- Project management experience, ideally in a business and/or consulting role.
- Marketing / selling experience would be an advantage, as would a foreign language

The Role:

- Make substantial contributions to technically demanding development projects in a technical, commercial and project management capacity
- Assess low carbon technologies from the perspective of hands-on experience in technology development
- Manage and implement projects for the Carbon Trust – TTP Incubator (www.ttpgroup.com/carbontrust), and carry out associated business development activities
- Conduct focussed market research and technology reviews, and develop growth strategy advice for companies supported on the Carbon Trust programme
- Building relationships with TTP's clients and developing new business for TTP

The Rewards:

- Competitive salary and benefits.
- Professional development into a variety of technical, business and leadership roles.
- Participating in a fast moving, world class business, with the opportunity to make a visible contribution to the success and growth of the business.
