

opportunities

TTP is looking for bright, hardworking, innovative and hands-on scientists and engineers with a high degree of commercial awareness to contribute to the continued growth and success of our business. Our success depends on the technical excellence, flexibility and commitment of our staff to ensure we meet our customers' targets – development timescales are short, the specifications demanding, and the projects often require international travel.

Consultant in Optics (ref.www-AS6)

Applied Science Group

The Qualifications:

- Physicist or Engineer with a 1st or 2.1 degree and PhD.
- Track record at commercialising complex optical or optoelectronic technology in an industrial setting and delivering multidisciplinary projects against challenging timelines and product requirements.
- Good market awareness and keen interest and capability in developing new market opportunities for technology. Business development or similar experience preferred.
- Very good communication and team skills including leading multi-disciplinary science and engineering teams.

The Role:

- Contribute to technically demanding development projects in a technical and/or project management capacity.
- Take the lead in client communications and management.
- Take responsibility for best in class project delivery.
- Identify and pursue opportunities to develop new business through individual and team creativity and building relationships with international clients.

The Rewards:

- Participating in a fast moving, world class business, with the opportunity to make a visible contribution to the success and growth of the business.
- Competitive salary and benefits.
- Professional development into a variety of technical, business and leadership roles.
