

# opportunities

TTP is Europe's leading technology development and engineering company. Based near Cambridge, England, we have about 300 staff developing technologies, products and manufacturing processes in fields that range from wireless communications and digital printing through to medical devices and life science instrumentation. Our customers are leading businesses throughout the USA, Europe and the Far East.

TTP is looking for clever, hardworking, innovative and hands-on scientists and engineers with a high degree of commercial awareness to contribute to the continued growth and success of our business. Our success depends on flexible and committed staff prepared to ensure we meet our customers' targets – development timescales are short, the specifications demanding, and the projects often require frequent international travel.

## Embedded Software Engineer/Consultant (ref.www-CW1)

### Communications & Wireless Group

The Communications & Wireless Group is a multidisciplinary group of engineers developing leading edge communications technologies and products. We undertake a diverse range of exciting and challenging programs for international blue-chip companies.

#### The Qualifications:

- Software Engineer with a 1st or a 2.1 degree.
- Capabilities in embedded C/C++ and software architecture design.
- In-depth experience of developing commercial embedded software
- Hands-on technical leadership and project management skills.
- Outstanding technical capabilities and a strong grasp of commercial issues.

#### The Role:

- Engineer for a diverse range of technically demanding software projects.
- Participate in client management and communication.
- Contribute to the growth of the business.

#### The Rewards

- Competitive salary and benefits.
- Professional development into a variety of technical, business and leadership roles.
- Participating in a fast moving, world class business, with the opportunity to make a visible contribution to the success and growth of the business.
