

opportunities

TTP is Europe's leading technology development and engineering company. Based near Cambridge, England, we have about 300 staff developing technologies, products and manufacturing processes in fields that range from wireless communications and digital printing through to medical devices and life science instrumentation. Our customers are leading businesses throughout the USA, Europe and the Far East.

TTP is looking for clever, hardworking, innovative and hands-on scientists and engineers with a high degree of commercial awareness to contribute to the continued growth and success of our business. Our success depends on flexible and committed staff prepared to ensure we meet our customers' targets – development timescales are short, the specifications demanding, and the projects often require frequent international travel.

Embedded Software Engineer (ref.www-ST1)

System Technology Group

You will be expected to:

- Immediately engage in a technically challenging and stretching environment.
- Contribute to and lead demanding medical projects.
- Be client-facing with excellent communication and presentation skills.

You will have:

- A 1st or a 2.1 degree in computer science or electronic engineering.
- Significant experience of commercial embedded software development.
- Good understanding of low-level electronic circuit operation.
- Experience of code development in a regulated development environment (such as medical or aerospace).
- Proven capabilities in embedded C/C++ and software architectures for embedded systems.
- Hands-on technical leadership and project management capabilities.
- Outstanding technical capabilities combined with commercial awareness.

Employment benefits

- Competitive salary and benefits.
- Professional development into a variety of technical, business and leadership roles.
- Participation in a fast moving, world class business, with the opportunity to make a visible contribution to the success and growth of the business.
